This project is to celebrate the heritage of the Dickinson Family and their businesses past, current and future, in West Virginia. The mural will be on a very focal wall in the office, as you exit the elevator. We would like it to entail our history, starting with salt, moving to coal, timber, banking and real estate development. It also needs to include our future vision of sustainability and green energy initiatives. If possible, incorporate our commitment to community through our charitable gifts. We will provide materials, such as salt, coal and timber from our land. We want the artist to incorporate their vision for these elements to tell our story. The wall is 9' high x 17' wide. The entire width does not need to be used.
